Cloud Service Architect (m/w/d)

YOUR MISSION:

As a Cloud Architect, you will make an important contribution to the company's further growth by ensuring the successful certification and launch of scalable cloud services. You will ensure rapid adaptation to new requirements, continuous operation and optimisation of cloud services, while always keeping an eye on revenue and costs.

YOUR RESPONSIBILITIES

- You define the cloud solution with a focus on costs and security

- You are the technical lead for the development of the cloud solution

- You create an operating concept and build up the DevOps team

- As the central point of contact, you are available to the product management team for all questions relating to cloud services

- You define requirements for the infrastructure provider and ensure their implementation

YOUR EXPERIENCES

- You have a master's degree in computer science or a comparable qualification as well as several years of experience in the field of cloud services

- You have relevant knowledge of cloud architecture, including microservices, container technology, messaging, networking, health monitoring, load balancing and orchestration

- In the areas of certificate management, firewall configuration, encrypted communication, database management, logging and continuous deployment, you have the necessary expertise

- You have experience in how to process new requirements in a structured way and how to set up 24/7 operation and staging

- Good communication skills in English and German complete your profile

WHY CHERRY SHOULD BE YOUR CHOICE

WHAT IS CHERRY DOING?

We are an international manufacturer of keyboards and mice for the gaming & e-sports, office, healthcare and industrial sectors. In addition, CHERRY produces high-end switches for mechanical keyboards. Since its foundation in 1953, CHERRY has stood for innovative and high-quality products that are specially developed for different customer needs.

YOUR BENEFITS

- You have a high degree of creative freedom in a rapidly developing environment

- You can expect a very collegial, ambitious and agile environment with a start-up character

- You will not only take over the technical lead in the development of cloud solutions, but will also be responsible for the functional build-up of a team

- You will receive a gross annual salary of €60,000 to €80,000 for a full-time position depending on your experience and qualifications, which is above the minimum salary according to the collective agreement (KV 'Datenverarbeitung und Informationstechnik')
