

Engineering Lead (m/f/d) - Embedded SW & Cloud Services

Lead people. Take responsibility for technology. Develop our cloud solutions to the next level.

YOUR MISSION

In this role, you will take overall responsibility for an interdisciplinary development team – in technical, organisational and people-related matters. You will lead and develop staff from the software and hardware development teams and establish clear structures to enable effective collaboration across system boundaries.

At the same time, as an experienced Cloud Service Architect, you will set the technical direction and make embedded systems, cloud services and platforms work together seamlessly. You will ensure that clear product visions are translated into stable, scalable and cost-effective end-to-end solutions, and foster an environment in which quality, personal responsibility and continuous improvement are the norm.

YOUR RESPONSIBILITIES

- You will take on the technical and managerial leadership of the development teams (software and hardware) and be responsible for their professional development, collaboration and ability to deliver

YOUR EXPERIENCES

- You have a relevant degree and several years' practical experience in software development
- You have in-depth knowledge of cloud architecture and the development of modern cloud solutions

- You will oversee the overall technical implementation and ensure close integration between embedded systems, software components and cloud services
- You will define and be responsible for the cloud architecture, with a clear focus on security, scalability, availability and cost optimisation
- You will develop a holistic operations and security concept and, together with the team, establish a high-performance DevOps setup
- As a key technical leader, you will work closely with product management and translate product requirements into actionable technical concepts for innovative digital health solutions
- Experience in leading teams and strong communication skills in English and German round off your profile

WHY CHERRY SHOULD BE YOUR CHOICE

WHAT IS CHERRY DOING?

Headquartered in Germany, CHERRY Digital Health develops innovative solutions for digital infrastructure in the healthcare sector. In addition to its market-leading eHealth card terminal for use in telematics infrastructure, the company offers intelligent software solutions for centralised management and secure digital communication. In this way, CHERRY Digital Health supports medical facilities in achieving efficient, reliable and future-proof workflows. With a strong focus on quality and many years of experience, CHERRY Digital Health is a strong partner for the ongoing digitalisation of the healthcare sector.

YOUR BENEFITS

- You will have a great deal of creative freedom and will play an active role in shaping the organisation, processes and technical direction
- You can expect a very supportive and ambitious working environment with a start-up feel
- You will lead an interdisciplinary development team and be responsible for building and developing a cloud team

- You will receive a gross annual salary of €80,000 to €100,000 for a full-time position depending on your experience and qualifications, which is above the minimum salary according to the collective agreement (KV 'Datenverarbeitung und Informationstechnik')

FRAMEWORK CONDITIONS

- **Company:** Cherry Embedded Solutions GmbH
- **Place of work:** Vienna (hybrid)
- **Working hours:** Full time
- **Line manager:** Managing Director
